6.4.3 Activity Resource Requirements (Outputs): This taken from the Group 3 project in PMGT 501. Activity resource requirements identify the types and quantities of resources required for each activity in a work package.

Resources of Family Reunion

Different resources are involved when members plan to have the family reunions. They include;

- Accommodation-During the reunions, the family members should be able to know where they are going until when the meeting ends.
- Decorations-The venue of the family members meeting is decorated with all sorts of materials e.g. flowers. This makes the place to look nice.
- Family History-This is a crucial part of the occasion since this is where the family genealogy is narrated by an elderly person who knows the family roots very well. This especially helps the little kids who probably don't have any clue about the family genealogy. Charts, stories about the family are told.
- Ideas-Many family members come up with different ideas on how to move on as a family during these reunions.
- Photography- In this century of advanced technology, pictures are taken in digital forms. This has helped to build strong family ties among the members. They take photos and share them on social media platforms. This helps them to reach quickly to other family members around the world.
- Publications- Some families have even gone a notch higher by publishing about the family history in books.

- Software's- Nowadays there are software in the market which help in the planning of household reunion occasions.

- T-shirts- Printing of T-shirts by family members that bear the surname. This promotes unity.
