Initiation Process Group Artifacts

13.1 Identify Stakeholder

13.1.3 Stakeholder Register (Output)

PMGT 690, ERAU, Prof. Sherman

By: Matthew Holtan

13.1.3 Stakeholder Register (Output)

This Artifact was taken PMGT 502 homework, developing a stakeholder register. It was taken as an example that was used from developing the Group Project.

The Stakeholder Register was saved as an Excel attachment separately

The main output of the Identify Stakeholder process is the stakeholder register. This contains all the details related to the identified stakeholders including identification names, assessment information and classification. The stakeholder register should be monitored and updated regularly throughout the life cycle of the project (PMI, 2013).
